

## Correction guidelines

Officially, a maximum of 100 points will be achievable, if all sections of the mandatory part are faultlessly done. But there will be also some extra points, only obtainable by adding extra features to the project.

A minimum of 60 points are necessary in order to pass this course.

You can add to your final project some code of another exercise already delivered, but if we suspect that you copied it from the Internet it will not count.

For each technology (HTML, CSS, JS...) there are some common aspects that will be necessary to fulfill in order to get full mark:

- Indentation
- Structure
- Meaningful names
- Clean code

Stuff	Points
HTML	20
CSS	20
Sass	10
JS / JQuery	20
Project organization	5
Download of necessary files	5
SEO	5
Social plugins	5
Deploy	10
<b>Examples of optional stuff</b>	
Animations	5
AJAX	5
Responsive (Bootstrap does not count)	5
